CONTAX Camera Instruction Manuals - Butkus

The Contax G1 debuted in 1994 and is built on an aluminum alloy chassis with titanium outer panels which makes it a very rugged body. The lens mount is stainless steel. The finder is non-focusing and covers only the lenses in the G line from 28mm to 90mm (there are accessory finders for the 16mm and 21mm) with parallax correction.

Contax G1 for sale | eBay

The G1 and G2 can be focused manually, but it's a strange process using a little wheel on the front of the camera body and checking for an LED confirmation of correct focus in the viewfinder; since there isn't a coincident image or other image-based focusing mechanism you're basically watching for a light to go on to indicate when the camera is focused properly.

Payroll Schedule B - hollifield.depilacaoalaser.me

The Contax G1 doesn't use the typical manual focusing system that most rangefinder cameras do, it uses a completely automatic focusing system. It's been a great system in my experience with it. I've been using mine for about a year now and I couldn't be happier. I wanted to try something new.

5 Frames with a Contax G1 - by Mitchel Gordon Brauns - 35mmc

So, if you are someone who seeks convenience when out taking photos, the Contax G1 will not disappoint you as the learning curve is pretty easy to get over. Since the autofocus system in the Contax G1 is driven by a motor in the camera body, and not in the lens, it does make some noise in the process.

Contax G1 Review (A professional Point and Shoot?)

The camera comes with its caveats though; manual controls are a bit cumbersome. Thankfully, there is a built-in light meter, so judging exposures is a cinch. These cameras can be very pricey but usually stay under \$1,000, which is much more affordable compared to an M-Mount Leica 35mm f2 lens. ... The Contax G1 is a titanium-clad, Japanese-made ...

Brugge Gedichten Met Tekeningen Van Andre Idserda

The Contax G2 is like no other rangefinder on Earth. In fact, its technological ethos employs certain tricks that are outright heresy to diehard fans of the classic rangefinder; it runs on batteries, its manual focus mode is terrible, and its viewfinder lacks frame lines and a focusing patch. But in spite of these radical [...]

Contax G2 Camera Review - The Anti-Rangefinder That's in a ...

The Fujica GER is a relatively light and very compact rangefinder that is fully automatic and will fit easily in your pocket. It originally used PC640A mercury batteries, these can be replaced with LR44's or equivalents with some packing round them. Without batteries it is not possible to use this camera and the film advance lever seems to be used as a switch.

The FUJICA GER Rangefinder Camera · Lomography

I've owned both. The G1 is maybe the better looking camera of the two for what it's worth but the G2 has useful improvements including a better viewfinder, better AF and includes a AF on button. In the know G2 users understand the AF on button is the best way to autofocus. On the G1 that half push often leads to accidental shutter activation.
