7. TV looks grainy. This is common with new TVs - and it means that your sharpness control is too high for the content you are receiving. In fact, some experts recommend turning sharpness down all the way to zero as it tends to aggravate any and all image source problems. 8. TV not properly showing 4K or other high resolutions.

### **TV Problems? Here Are Nine of the Most Common and How To ...**

The television was invented in the early 20th century as a novel way to transmit moving pictures through radio waves. Early television sets actually used mechanical means to etch out a picture from a signal using a Nipkow Disk, with the first demonstration taking place in Paris in 1909. This early "television" technology was capable of transmitting an 8x8 pixel image, with the first ...
