applications. At the end of this webinar, you will get a basic familiarity of Qt Creator, the complete integrated development environment to build cross-platform applications and UIs.

Get started with Qt Quick

A normal building command will look like this: `python setup.py install`

```
--qmake=/path/to/qmake \ --ignore-git \  
--debug \ --build-tests \ --parallel=8 \  
--make-spec=ninja \ --verbose-build \  
--module-subset=Core,Gui,Widgets.
```

Which will build and install the project with debug symbols, including the tests , using ninja (instead of make), and considering only the module subset of QtCore, QtGui and QtWidgets.
