Hamilton's founding the same year of his Hamilton Aero Manufacturing Company in Milwaukee, Wisconsin. Hamilton Standard Ground Adjustable Flying in the skies in 1929, 80% of the propellers were Hamilton Standard.

Hamilton Standard Propeller Information

The world-class Hamilton Standard Hydromatic propeller. The central dome houses a piston, fixed cam, and rotating cam that use hydraulic power to rotate the propellers blades on their own axis to enable constant speed, feathering, and reversing.

Hamilton Standard Superhydromatic 01

The Hamilton Standard Hydromatic propeller represented a major advance in propeller design and laid the groundwork for further advancements in propulsion over the next 50 years. The Hydromatic was designed to accommodate larger blades for increased thrust, and provide a faster rate of pitch change and a wider range of pitch control. This

HYDROMATIC PROPELLER - ASME

handling propellers. These include C-hooks, yoke assembly, spreader bar, lock mechanism, release cable and safety cable. (See Fig. 1-1.) I. Retainer Nuts and Spanner Wrenches Attach base plate assembly to Hamilton-Standard Propeller (See Fig. 1-4.) J. Hub Adapters-Used with some base plate assemblies for Aeroproducts propellers.

Operating Manual and Maintenance Instructions

Placed on the ramp in front of the airplane is equipment that has been removed or replaced. Note the four "cuffed" Hamilton Standard propeller blades along the right side of the photograph. They have been replaced with un-cuffed and polished Hamilton Standard "paddle" blades. More aviation photos by Allan Grant

propeller - How do blade cuffs help cool the engine ...

Hamilton Standard Hydromatic Propellers Many of the hydromatic propellers are used with older type aircraft involved in cargo operations. A hydromatic propeller has a double-acting governor that uses oil pressure on both sides of the propeller piston. Many larger turboprop systems also use this type of system.
