Health Promotion Throughout the Life Span - 8th Edition

Health Promotion Throughout the Life Span. Health promotion is a concept and a process that extends through-out the life span. Studies have shown that the health of a child can be affected either positively or negatively by the health practices of the mother during the prenatal period. Therefore, health pro-motion starts before birth and extends through childhood, adult-hood, and old age.

Mental health is a major issue for adolescents: up to half of all mental health conditions start before the age of 14. Poor mental health is the leading cause of disability in young people, and accounts for a large proportion of the global disease burden during adolescence. Suicide is the third leading cause of death in 15-19-year-olds.
