Inside the Helmet: My Life as a Sunday Afternoon Warrior ...

The Multi-directional Impact Protection System (MIPS) is a low-friction liner inside the helmet that helps to reduce rotational energy to the brain in an angled impact. The MIPS system allows the helmet to rotate independently around your head, redirecting impact energy and providing more protection in certain impacts.

Frequently Asked Questions - Giro

That said, the Manifest is a great helmet for hot days on the trail, and not overly sweat-inducing. There is room for goggle stowage on the brow of the helmet with the visor pushed up to the max, but the goggle frame will likely hang down a little bit. There are some rubber grippers on the inside of the helmet as well.

Safety comes first for kids while riding a cycle, therefore, parents cannot overlook the need of wearing a helmet while cycling for their kids. A well-fitted safe helmet, which looks fun and ...

High quality cycle helmets for kids | Business Insider India

When a helmet with the MIPS & REG; Brain Protection System is subjected to an angled impact, the low friction layer inside the helmet allows the helmet to move. That movement during those crucial first .0002 seconds can reduce the amount of rotational motion (a combination of rotational energy and rotational forces) transferred to the brain and reduce the risk for minor and severe brain injuries.
