The pump consists of a small gear pump and the powering electric motor. Depending on the year of construction, the electric motor used by Lamborghini is a vulnerability and likely to fail due to its location in a high temperature area.

Lamborghini Murcielago - Shop - SequParts

These pumps have a bronze housing and brass or bronze gears for use with water. Select your own motor to tailor them to your application. Use a NEMA 56C frame electric motor with a coupling and belt/pulley drive. Also known as gear pumps, they produce a smooth flow of liquid for water delivery.

Water Gear Pumps | McMaster-Carr

A device called the hydraulic actuator does the gear shifting when the paddles at the steering wheel are pulled back. The hydraulic actuator may fail by developing an internal leak (sometimes not long after the warranty runs out). Lamborghini recommends you have a new unit installed but they're quite pricey.
