Low-Fiber/Low-Residue Diet - University of Michigan

A low-fiber/low-residue diet is for people who need to rest their digestive system (gastrointestinal tract). A low-fiber/low-residue diet limits the amount of food waste that has to move through the large intestine. In addition to limiting foods high in fiber, it may be necessary to limit foods that cause

Low-Residue Diet: Foods, Menus, and More

A low residue diet restricts the intake of such foods. This diet is suggested by doctors in case of inflammatory bowel disease (IBD) or an abdominal surgery. The foodstuffs that can be included in this diet are white rice, refined dry cereals, refined bread, milk, ice cream, tender meat, eggs, fish, poultry, jelly, honey, vegetable juice, etc.

Low Residue Diet Cookbook: 70 Low Residue (Low Fiber) Healthy Homemade Recipes for People with IBD, Diverticulitis, Crohn's Disease & Ulcerative Colitis

A low-residue diet is a low fiber diet with added restrictions that are designed to reduce the amount of stool in the large intestine.; A low-residue diet is a temporary eating plan with the goal of "resting" the bowel. Low-residue diets may be prescribed during flares of inflammatory bowel disease (Crohn's disease and ulcerative colitis) before or after bowel surgery, when tumors or narrowing ...

Low-Fiber (Low-Residue) Diet: 15 Foods Eat and Avoid

A low-fiber diet limits the types of vegetables, fruits and grains that you can eat. Occasionally, your doctor also may want you to limit the amount of milk and milk products in your diet. Milk doesn't contain fiber, but it may contribute to discomfort or diarrhea, especially if you're lactose intolerant.
