Say that you plan to use trend trading based on technical indicators. You would probably use the moving average cross-over system. This method relies on the long-term and short-term moving averages. When the price of the short term average crosses over the long-term, it usually indicates an upward trend.

Constructing a Mechanical Forex Trading System | ForexTraders

Strategy Nr. 5 - Trend Trading with MACD . The MACD (Moving Average Convergence Divergence) is a mix between a trend indicator and an oscillator. For this reason, it earned its place in an article revealing trading strategies to follow the trend. This one is quite simple and works with many other oscillators that have both positive and negative values.
