High grade ores and ores resistant to cyanide leaching at coarse particle sizes, require further processing in order to recover the gold values. The processing techniques can include grinding, concentration, roasting, and pressure oxidation prior to cyanidation.

Gold extraction - Wikipedia

Abandoned Mining Claims are Great Places to Find Gold. Mining claims serve a very important purpose to gold miners. Once you've file a claim on a particular piece of land, the miner has the sole mineral rights to that land as long as the claim remains valid. The general public can still camp, fish, hunt, and do other activities on an active claim, but all minerals within the claim boundaries belong to the miner.
