Intensive contact brings about diffusion of grammatical categories.

Grammaticalization of lexical items is one of the mechanisms at play as languages converge and new categories develop. In a situation of intensive contact-induced change, the forms to be grammaticalized, and semantic changes involved, may turn out to be somewhat unexpected, forcing us to reconsider potential constraints on ...

This study highlights some notable typological features of ancient and modern Semitic languages. It sheds light on a number of shared intragenetic similarities and parallels within Semitic in the processes and outcomes of grammaticalization. Specifically, it examines the emergence and evolution of prepositionals from certain body-part terms; the shift from synthetic towards more analytic ...
