Some currently preferred constructionist-theory-based therapy models include solution focused brief therapy, narrative therapy, feminist therapy, Eriksonian therapy and identity renegotiation counseling.

Counseling Theories and Approaches

In systems theory therapy, the focus moves away from problems with the individual and instead challenges group members to be aware of how their actions and reactions influence everyone around them. Making the whole system healthier not only helps the individual overcome some of their concerns or problems, but it can also help prevent these issues from recurring in the future.
